Trusted Insurance Company

17/12/2021

OVERVIEW

In the insurance agency ,the recent year has made good progress but at the same time it has many problems and challenges to face.

The insurance agency gets leads from the people who are interested in their services from multiple online platforms such as facebook,linkedin,google etc.

The online platform is the best way to generate leads for insurance agencies. The online platform can help to connect with more clients and grow our business. But not all leads are generated online some common way insurance agents generate leads are through offline tactics such as buying lead lists and networking.

There are a number of problems that face insurance companies and insurance brokers, a few of the main ones are:

- Ghost Brokers
- Fraudulent Purchases
- Claims Rings
- Customer Relationship Management
- Brand Identity/Management

Faced with these problems, it is more important now more than ever, for insurers to deliver a compelling and consistent customer experience, maximize sales from their client base and streamline their workflows.

As a mentor, producer the first and most important step is establishing a close and harmonious relationship with the client. Build value for our client, help them understand why our products are the solution to their problem.

To overcome the problem of insurance agency, '**The trusted insurance**' provide different Types of Insurance Policies likes,

- Health insurance
- Car insurance
- Bike insurance

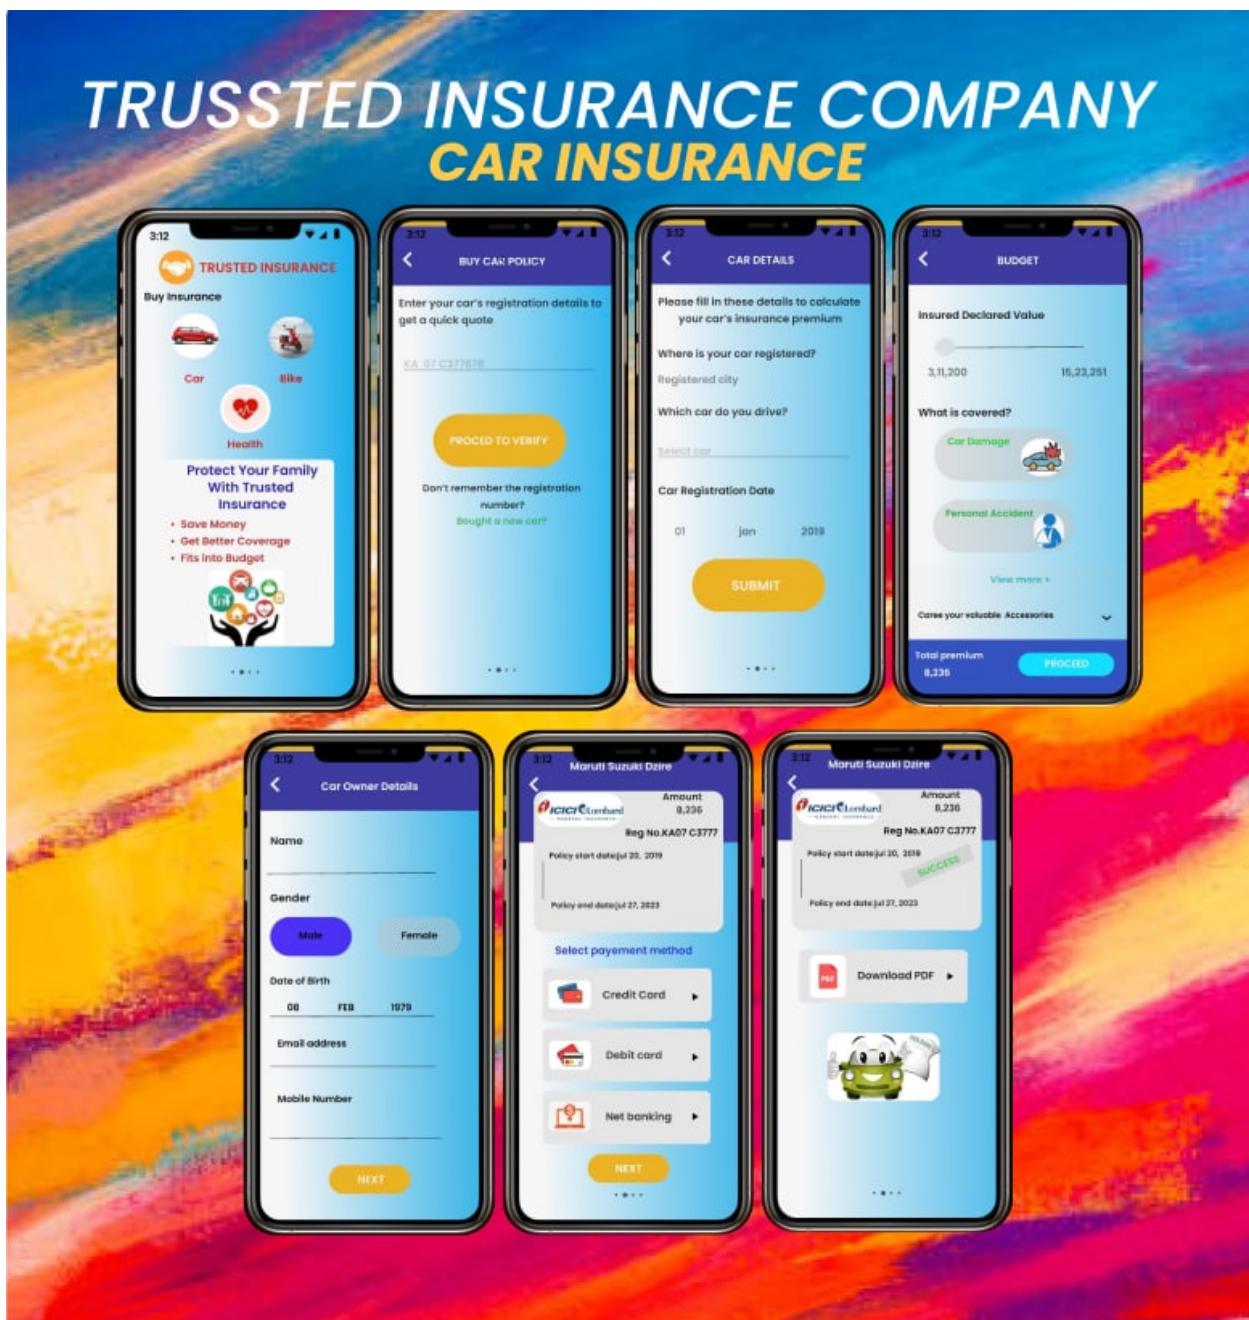

FEATURES

1. Insurance is not an investment rather it is a hedge against the future probable losses.
2. Insurance policies can be modified and offered to people depending on their risk profile and the need of the insurer.
3. The amount is mentioned in the insurance policy and the more the insurance cover the more will be the premium which one has to pay to the company.
4. A person can take more than one policy, in other words there are no restrictions on the number of policies one can take.
5. There must be a large number of similar risks.
6. The loss caused by the risk must be definite.
7. The cause of insuring must be economically feasible.
8. Sharing of Risk-Insurance is a device to share the financial losses which might befall an individual or his family on the happening of a specified event.
9. Co-operative Device-The most important feature of every insurance plan is the cooperation of a large number of persons who, in effect, agree to share the financial loss arising due to a particular risk that is insured.

Using Figma Software

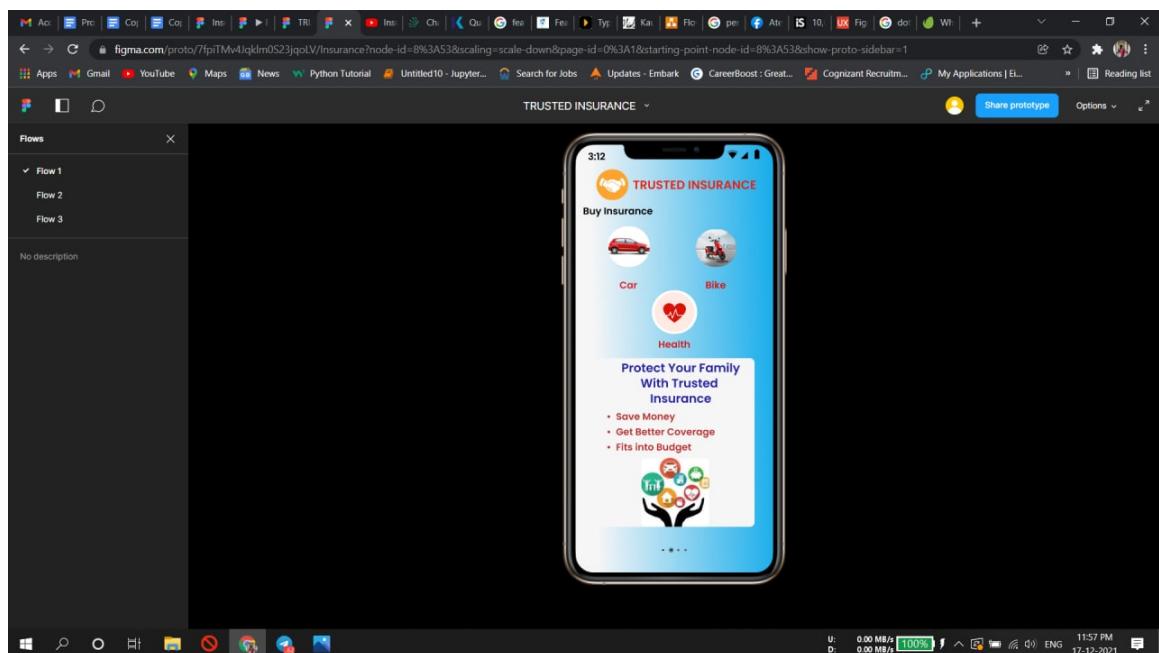

About Figma:

Figma is a browser-based UI and UX design application, with excellent design, prototyping, and code-generation tools. It's currently (arguably) the industry's leading interface design tool, with robust features which support teams working on every phase of the design process. If you haven't already, try it!

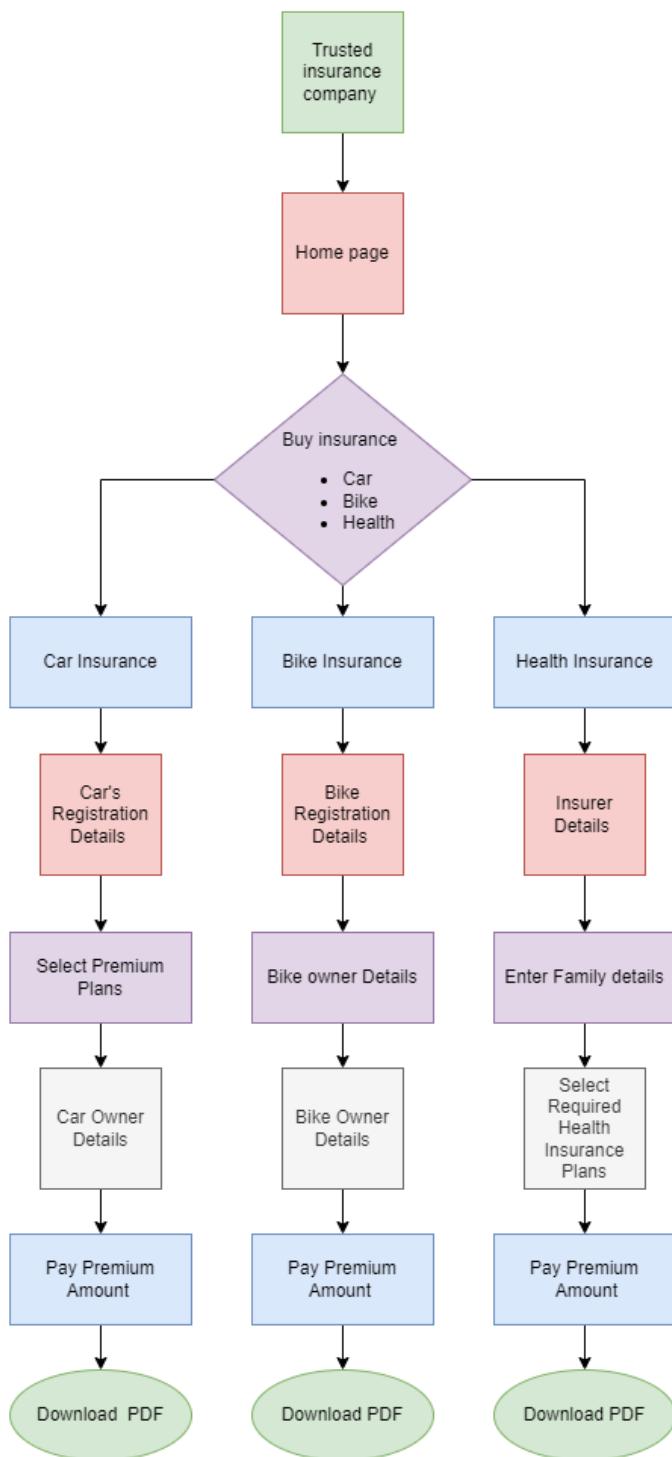

- In Figma, a node on a vector can have multiple segments attached to it (more than just the standard two). The more complex shapes you can make with these are called “vector networks”.
- Figma allows you to quickly and easily import multiple images at once, placing them exactly where you want them.
- When you move an object around the canvas in Figma you'll see its height and width reflected in the rulers.
- Copy the SVG code directly from an object within Figma, and conversely, you can copy SVG code from a code editor and paste it as a graphic onto the Figma canvas.
